

# You Owe It To Your Grandchildren To Tell Them The Truth About Privatization!

President George W. Bush and others want to convince people in their 20s that Social Security will not be there when they retire. It's a lot easier to take something away from people if they don't think they are going to get it anyway. They hope you, your children and your grandchildren won't fight their Social Security privatization plan, but they are not telling you that it will drastically cut benefits. **Don't fall for it.**

## WHAT SOCIAL SECURITY PRIVATIZERS DON'T WANT YOUNG PEOPLE TO KNOW...

**If you want to receive less money when you retire, then Social Security privatization is right for you!**

(If you are in your 20s and the Social Security plan is enacted, you will receive 25% less in Social Security benefits.)

**If you welcome shouldering an additional \$2 trillion in debt, then Social Security privatization is right for you!**

(Establishing private accounts creates at least a \$2 trillion financial crisis for Social Security that does not currently exist because this amount will have to be borrowed in order to pay for transition costs.)

**The Circle of Generations**

**If you like the idea of supporting your elderly parents, then Social Security privatization is right for you!**

(Privatization will cut benefits, shrink nest eggs and create the risk of poor investments.)

**A 20 year-old worker today could expect to receive over \$440,000 from Social Security, but will receive \$100,000 instead under the Bush Plan.**

**If you don't mind Wall Street corrupting Social Security and wasting your money, then Social Security privatization is right for you!**

(Wall Street has spent millions of dollars lobbying Congress for the privatization of Social Security and will win big if private accounts are created.)

**If you think the word "voluntary" means being told where to invest, then Social Security privatization is right for you!**  
(The federal government will decide what investment rules you play by.)
